

How to Display Language Bar on Windows XP

<p>1. Click Start at the bottom left, and click Control Panel.</p>	 <p>A screenshot of the Windows XP Start menu. The 'Control Panel' icon is circled in red, and the word 'CLICK!' is written in red next to it. Other icons visible include Spider Solitaire, Microsoft Word, My Network Places, Connect To, Printers and Faxes, Help and Support, Search, and Run... The taskbar at the bottom shows Log Off and Shut Down buttons.</p>
<p>2. If you are in category view mode (like the one you see on the right) then click Date, Time, Language, and Regional Options, otherwise proceed to step 3 directly.</p>	 <p>A screenshot of the Windows XP Control Panel in category view. The 'Date, Time, Language, and Regional Options' category is circled in red, and the word 'CLICK!' is written in red next to it. Other categories include Appearance and Themes, Printers and Other Hardware, Network and Internet Connections, User Accounts, Add or Remove Programs, Sounds, Speech, and Audio Devices, Accessibility Options, Performance and Maintenance, and Security Center.</p>
<p>3. Click Regional and Language Options.</p>	 <p>A screenshot of the 'Date, Time, Language, and Regional Options' window. Under the heading 'or pick a Control Panel icon', the 'Regional and Language Options' icon is circled in red, and the word 'CLICK!' is written in red next to it. Other options listed include 'Change the date and time', 'Change the format of numbers, dates, and times', and 'Add other languages'.</p>

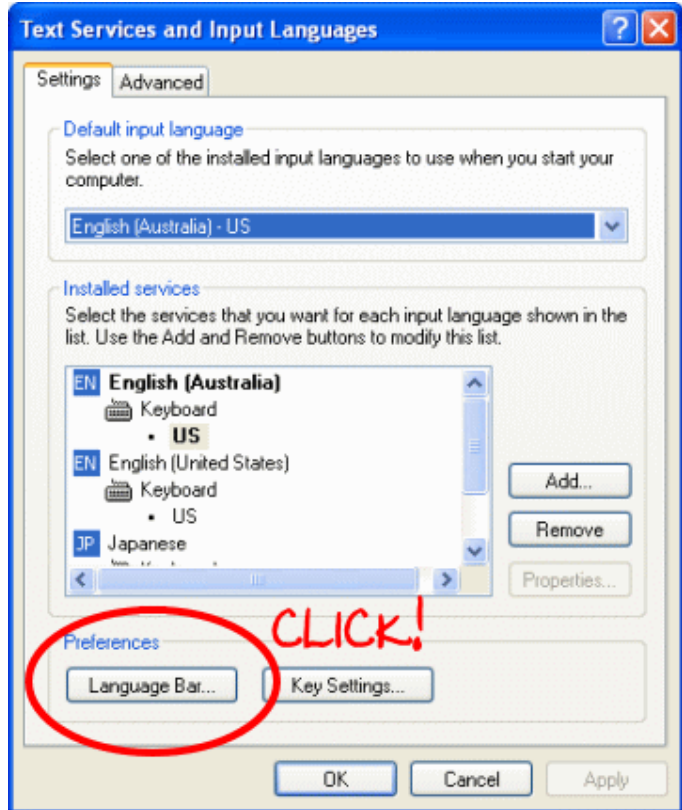

4. Click Languages.

5. If you are about to use Armenian or Georgian keyboard, ensure that "Install files for Complex Script and RTL languages (including Thai)" option is enabled (may require Windows install CD when enabling). This is NOT required for installing Russian keyboard. Click Details...

6. Check if you have all needed input languages with the appropriate keyboard layouts in the list, otherwise click **Add...** to add missing languages and/or keyboard layouts.
When done, click **Language Bar...**

7. Check **"Show the Language bar on the desktop"** and click **OK**.
Congratulations, you are done :-)
